# HEALTH AND SAFETY POLICY

## RESPONSIBILITIES

Overall responsibility for health and safety within the school is that of: **NOTE**

**Mrs Morton-Lee (Head Teacher)**  
**Mrs Vetch (Chair of Governors)**

Insert the name of the Headteacher and the Chair of Governors, (or the Governor with responsibility for health and safety).

Day to day responsibility for ensuring this policy is put into practice is delegated to:

**Mrs Briggs (School Manager)**

If the Headteacher is not always there, or does not have time to manage on a day-to-day basis, you can delegate this role to someone else, e.g. Deputy Headteacher, Head of Year, Premises Officer etc. Ensure that the person with overall responsibility is kept informed of health and safety matters – it will still be their overall responsibility

To ensure health and safety standards are maintained/improved, the following people have responsibility in the following areas:

**Name: Mr Barlow**  
**Responsibility: Health & Safety Governor**

Delegate functions to people within your organisation either by specific areas within the workplace or by topic. Include their specific responsibilities in their job descriptions (if they have one).

Ensure that they are competent to undertake their health and safety responsibilities and have adequate resources to enable them to do their job properly.

It is important that responsibilities are clearly set out – this will make sure that if there are any health and safety concerns they can be reported to the right person, so they can be dealt with.

You may wish to insert a diagram or chart showing your management structure/arrangements.

**Specific responsibilities for head teachers, managers, heads of departments and staff can be found in Section 1 of the Children and Young People Service Health and Safety Policy and Guidance Handbook 2012 which can be found in:**

**School Office**

Employees have legal responsibilities to take care of the health and safety of themselves and others, and to co-operate with management to help comply with the law.

Equally, if employees have any concerns over health and safety issues, they should be clear about whom they should tell, so that concerns can be addressed.

**All employees have to:**

- **co-operate with supervisors and managers on health and safety matters;**
- **not interfere with anything provided to safeguard their health and safety;**
- **take reasonable care of their own health and safety and of others; and**
- **report all health and safety concerns to an appropriate person (as detailed in this policy statement).**

- Refer to NYCC Occupational Health - 01609 785780

Your COSHH assessments should identify all areas and the type of health surveillance needed.

Your records should contain details of the employees, the health surveillance procedures, dates and conclusions. The health care professional doing the surveillance will hold the actual medical records, as these are confidential.

Providing immediate first aid can prevent minor injuries becoming major ones.

As a minimum you must have a first aid box and an appointed person to take charge of first aid requirements. You can find more information in HSE's free leaflets:

- First aid at work – your questions answered INDG214 1997

You can do this both actively and reactively, i.e. before and after something goes wrong.

**Actively** - you or other appointed person can carry out inspections, have reports submitted to you by managers, do spot check visits, safety representative inspections, etc.

Trade union safety reps have the right to carry out inspections and investigate accidents.

**Reactively** - you can investigate any accidents or sickness absences that occur.

Investigating accidents is a useful way of reviewing your safety systems – ask yourself why the accident really happened and what you can do to stop it happening again.

Similarly, if you have a number of employees absent because of similar ailments, this might mean there is a problem with their jobs causing ill health.

When you find out what went wrong – put it right.
