

Mathematics

This term our focus will be on measure, number and place value and algebra (Year 6 only). We will, of course, continue to work on our basic skills, including times tables and rapid recall of fundamentals like number bonds.

English

In English, Class 2 will be reading and writing biographies and looking at stories from other cultures, as well as historical texts.

Science

We will develop our understanding of how to conduct a fair test during our investigations and experimentation, but our focus this term is on materials. What are the materials around us and how do their individual properties make them useful? We will look at conductors and insulators, magnetism, the three states of matter and solubility.

History/Art/Geography

The focus this term will be on different artists through the ages and around the world.

We will learn about the geography of different continents: the main countries and cities, industries and their physical features, for example.

Art Around The World

R.E.

The five pillars of Islam
The Qu'ran
The Prophet Mohammed
Ramadan
Mosques

Spanish

This term's activities will include widening the children's vocabulary and grammar and developing an understanding of the history and culture of Spain.

P.E

In P.E. the children will be learning and developing skills in athletics, starting with the basics and moving to more advanced skills.

Computing

The children will continue to learn and develop their understanding of coding (writing computer programmes). They will also be consolidating and developing word processing skills, and we will be learning about how to use the Internet safely.

Music

Understand how musical notation is constructed.
Develop an understanding of sound, including rhythm and tempo.
