

## Homework Overview

Term: Autumn Term 2021

Class: 2

### Homework

Each week your child will select a piece of homework from the grid. These activities are designed for your child to practise their research and reading skills along with writing skills. The work should be well presented.

We expect your child to read five times a week and practise their times tables.

### Home-School Partnership

|   |   |  |
|---|---|--|
| Do some research about the time in which Shakespeare lived. What was different about life then?   | Choose one of Shakespeare's plays. Create the DVD case of it. You must set it out like a proper DVD case, but it is up to you how you show the play. You choose actors.           | Create a quiz book, based on Shakespeare's life, times and plays. At least 8 pages of activities.  |
| Do two sketches of costumes from Shakespeare's plays. Label them carefully and include the fabric that they were made from. Remember to state the play and character! | Create a diary entry from someone in Shakespeare's day. It could be an actor or somebody visiting a play at the Globe.  | Write a newspaper article, set in Shakespeare's time. You must write about something to do with a play - such as an opening night, royal premiere or something of your choice. |
| Create a quiz on William Shakespeare. It must have at least 15 questions and an answer sheet. I expect more than true or false.                                       | Find out about the Globe Theatre. Create a factfile about its history and how it is still used today - work must be paragraphed and include features of a non-chronological text. | Research a play. Create a comic strip of it. You can choose how to set it out, but you must include key scenes and full colour. I have high expectations of this activity.     |

BE THE LIGHT

## Homework Overview Term: Autumn Term 2021 Class: 2

There are a few ideas here on how you can support your child in other areas of their curriculum learning this term.

At home, you could **talk** about how to stay safe online and how to find appropriate websites when researching for information.

At home, you could **read** holiday brochures about Italy and plan a perfect family holiday. With something to do and visit that fits the interests of everyone in the family. Get to know some of the most famous places to visit.

At home, you could **practise** written calculations with your child. You could help to improve their speed and accuracy by setting time challenges.

At home, you could **create** an Italian dish or feast. You can help your child weigh out ingredients accurately or use mental maths to adjust recipes for fewer or more guests.

At home, you could **listen** to... Science Podcasts for Kids and find out about the science behind your favourite foods.
